BLUETOOTH APP, REMOTE, DIMMER

The intelligent solution with short-wave infrared technology

HEATING

As a pioneer in the field of short-wave infrared technology, we now have the benefit of almost 25 years of production experience. Since the early days, our heaters have developed into highly-efficient high-tech systems, used in practically all conceivable areas. Indoors or outdoors for household, commercial, industry and public environments. Permanent or temporary installations, single units to multiple installations. With options of lighting, heat control and our unique cooling systems, you have a solution for virtually all areas and environments.

We have all experienced being exposed to the blistering sun but at dusk it becomes noticeably cooler. It is precisely why we developed PERFECTCLIME®. The unique all-in-one combined heater and cooler. Tried and tested short-wave infrared technology combined with the patented PERFECTCLIME®. This option provides instant cozy heat or pleasant cooling whenever it is required under the motto - PERFECTCLIME at any time.

BURDA
PERFECTCLIME

ALL FROM
SOUL

COOLING

BURDA
WORLDWIDE
TECHNOLOGIES

Our high-quality lighting systems, whether part of a combination or simply as a light bar, have been specifically produced in terms of design and technology to match our heater series for both indoor and outdoor use. The light bars complement our existing heating systems to provide a good-looking, efficient, high-quality and elegant product range. Whether bright workplace lighting or colored illumination at catering outlets or at events, the opportunities are practically limitless.

LIGHTING

BURDA
PERFECTCLIME
SINCE 1990

FROM ONE
SOURCE

QUARTZ INFRA-RED HEATER CONTROLLER

Our complete range of accessories and controllers enables effective, intelligent and especially cost-efficient installations in all kinds of indoor and outdoor areas. Fully automated with the use of timers, dimmers, motion detectors and other sensors as well as a variety of brackets to allow easy installation and use even in larger, more complex projects.

CONTROL

BURDA Perfectclime – the intelligent way

INTELLIGENT SOLUTIONS

As the pioneer in the field of infrared short-wave technology our unique expertise and experience enables us to move the technology forward. The innovative products we offer are the best evidence for intelligent solutions. Producing efficient, energy saving instant heating or cooling products is our passion. Customized solutions, perfectly attuned to people and the environment guarantees an almost unlimited range of uses.

INTELLIGENT ANSWERS

We listen, identify and understand relevant customer needs to find the right answers together. It goes without saying that we are passionate, flexible, customer focused and reliable.

INTELLIGENT REALIZED

Highest standards in the production process and the use of sophisticated materials represent BURDA's claim of always offering its customers only the very best in terms of high quality, design, functionality and high performance. This is the only way possible to set standards worldwide.

INTELLIGENT ADVANTAGES

- Original since 1990
- Unique quality standard
- High quality processing and manufacturing depth
- High quality substance and components
- Increased durability and burning duration
- Efficiency straight to the point
- Emission-free and clean (depending on electricity mix)
- Broad power spectrum up to 18 kW
- Wide choice of colors and models
- High quality elegant design
- Long-lasting, weatherproof aluminum

INTELLIGENT APPLICATIONS

Hotel, bar and catering industry

Sport (swimming pool, golf house, etc.)

Halls (production, warehouse, trade fair, etc.)

Churches

Balcony/terrace/conservatories

Garages/factories

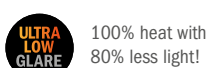

Hangars

Live stock

⚠ Up from 2kW we recommend to use 16A slow blow fuses (C16)

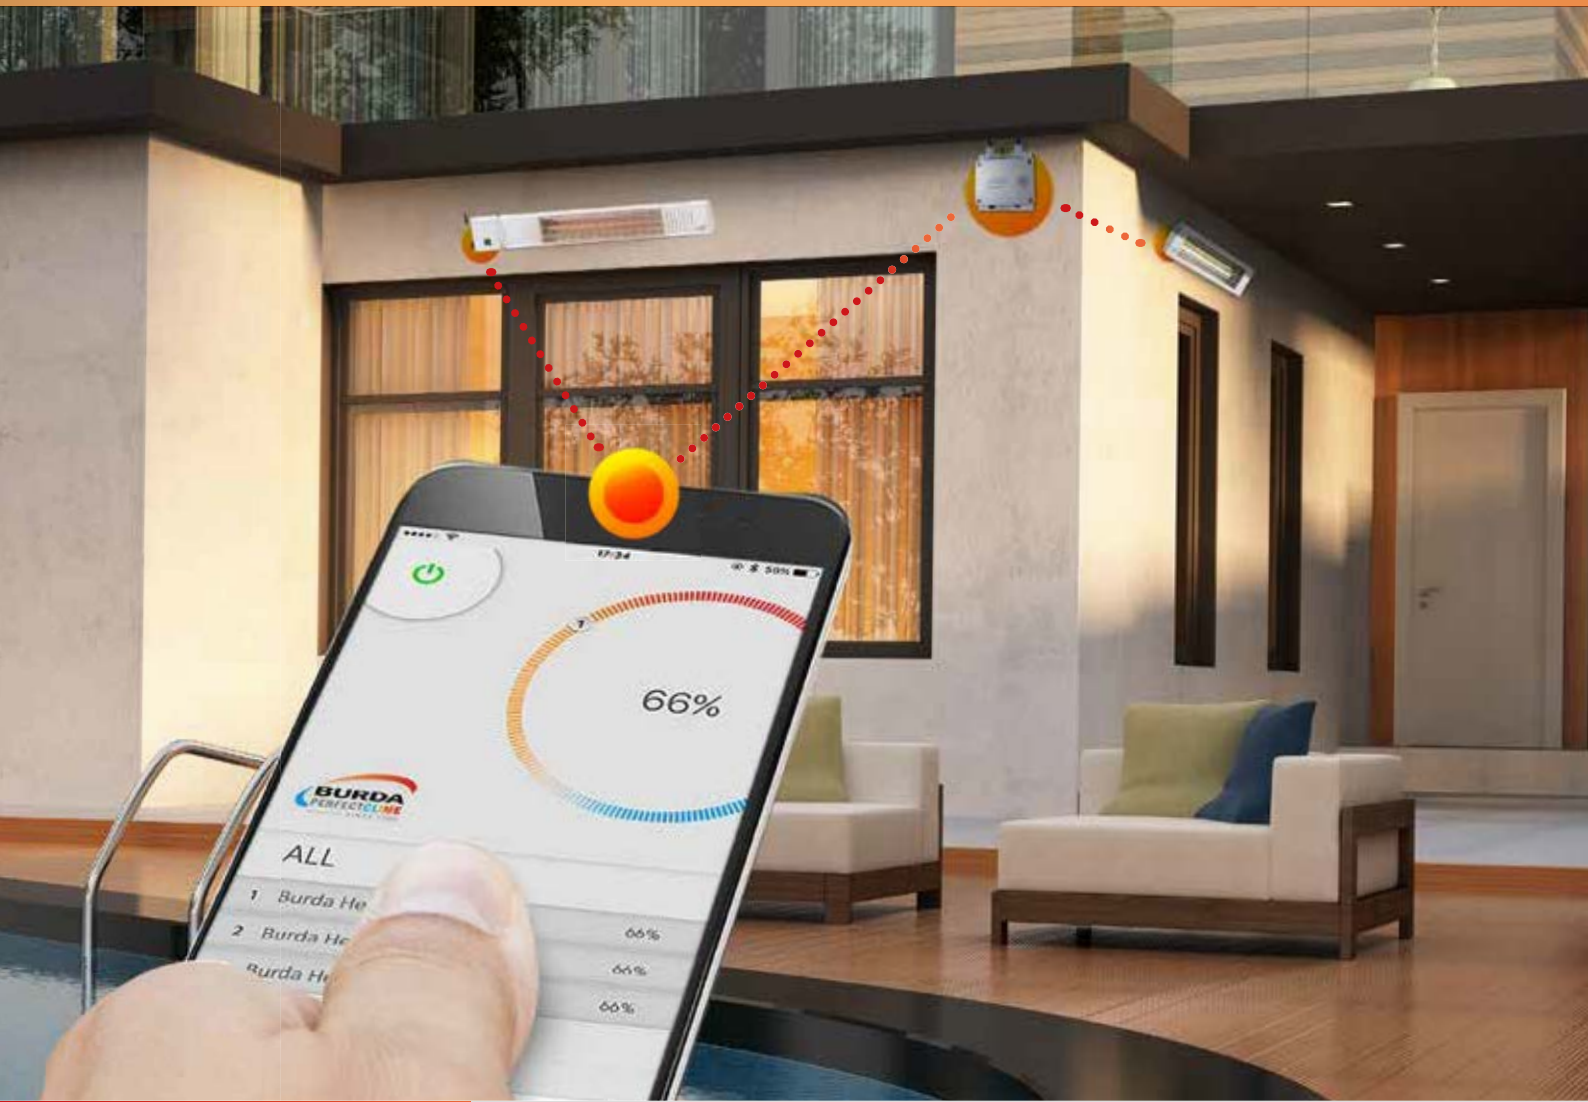

IP20 = Indoor
IP24 = Indoor and Outdoor

IP65 = Outdoor
IP67 = Outdoor

TERM 2000

Our TERM 2000 has been designed to provide easy heating of indoor and outdoor areas. It is fitted with a specially developed and manufactured infrared gold tube with a very high operating life of up to 5,000 hours. Depending on the application and the required power output, the TERM 2000 is available in IP24 and IP44 versions, and as a completely waterproof IP67 version. The IP67 is also available as double, triple (IP67 only). All the advantages of the TERM-series are also available as freestanding versions: TERM TOWER PALMS! Ideal for hotels and restaurants, the TERM TOWER PALMS offers optimum heating power for all indoor and outdoor areas – particularly where other systems could not be used because mounting was not possible. There are many different configuration possibilities (i.e. light) which guarantee an infinite field of applications. Also available with table and ashtray.

APPLICATIONS

Restaurants/cafes, hotels, patios, offices, garages, greenhouses, halls, household, churches, public buildings, swimming pools, animal husbandry, workshops, drying-out of buildings

LIGHT & HEAT

Wherever the „right“ brightness is important, our heating/light combination devices should be your first choice. In technology and design they are based on the tried TERM 2000-series in combination with 2- and 4-beam LED spots (240V/3,5W). The devices are waterproof according to IP65, heating and light are separately controllable and dimmable optionally – specially tuned dimmers are also available as accessories.

APPLICATIONS

Patios, balconies, summer houses, hobby rooms

CONTROL

Tailored to our infrared heating and lighting range, our accessories provide intelligent solutions for the use and operation of our systems. Dimmers, timers and remote control solutions enable optimized, customized heat management – simple and effective.

REMOTE DIMMERS

DIMMERS/TIMERS

MOTION DETECTORS/TEMPERATURE SENSORS

ADD ON

Are you looking for a way to install our systems temporarily and to quickly assemble and dismantle them? Our range of clamping and stand solutions are just what you're looking for – stability and rapid assembly guaranteed.

Standard with every Color and No Glare heater

T-BRACKET

Instead of a T-bracket you can mount the Color and No Glare heaters with our two other brackets **MB040** and the **Short bracket** (available as add-on)

Standard with every aluminum heater

L-BRACKET

AWNING BRACKET

Ideal for installations on awning profiles

SHORT BRACKET

It functions on Color and No Glare heaters in combination with our ceiling bracket **BCDF20** as a adapter for a stable mounting (available in white, black and anthracite)

CEILING BRACKET

Ceiling mounting **BCDF20** for Color, No Glare and aluminum heaters (available in white, black, anthracite and aluminum), 20 cm

PARASOL BRACKET

Strut clamp with star-shaped handle

POLE BRACKET

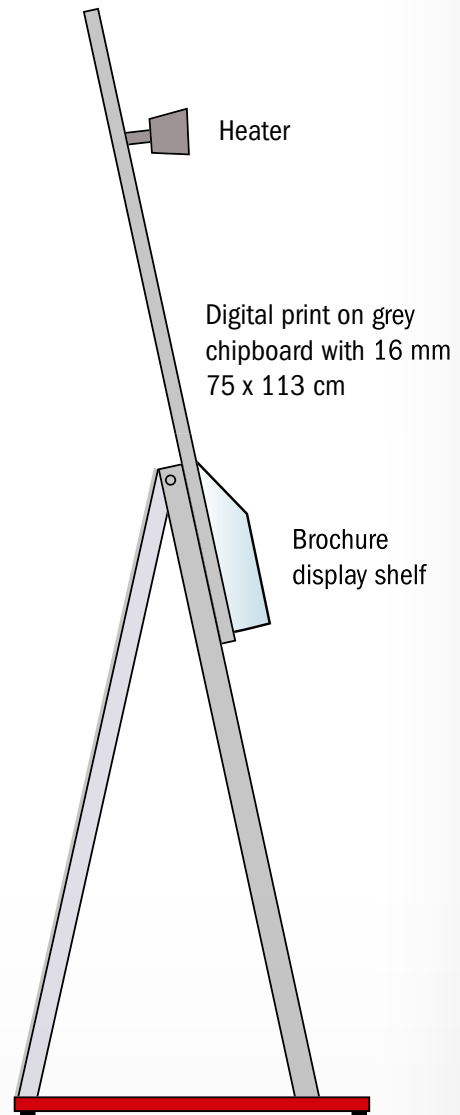

Strut and mast bracket with Velcro

TRIPOD STAND

Stand up to 210 cm

Promotion

**YOU WILL BE INSPIRED BY
THE INNOVATIVE INFRARED
HEATER FROM BURDA.**

Convince your clients with intelligent comfortable heat at the push of a button. With this new professional display, guide the attention of your clients to our innovative heaters. The huge and instant heat output is most effective during this live demonstration.

A push-button timer and a display shelf for complimentary brochures is included.

What is infrared?

SUCCESS WITH THE INTELLIGENT TECHNOLOGY

Infrared short-wave technology: Infrared radiation is a sub-area of the light spectrum generated by the sun. This type of light, however, is invisible to the human eye; it only serves to radiate heat. Basically: the shorter the wavelength, the easier it is to penetrate the air. Short-wave infrared generates heat by heating the object it meets with, without heating the air around it. Even effective and instant heat without pre-heating. A good example for this mode of action is the effect that occurs when a person walks out of the shade into the sunlight. Although the ambient temperature remains the same, they feel the temperature as considerably warmer under direct solar radiation. Economically, environmentally convincing and cost-saving for more advantages.

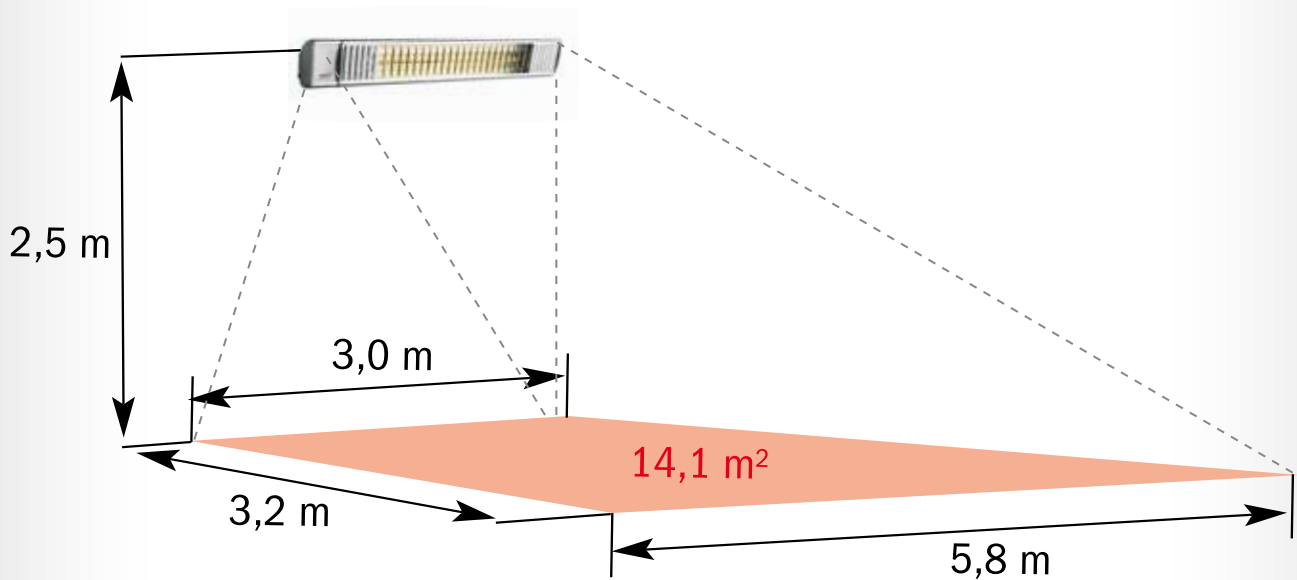

EVEN BETTER THAN BEFORE – LOW GLARE BECOMES ULTRA LOW GLARE

Low Glare has now become Ultra Low Glare – we have succeeded in further developing the tried and tested Low Glare tubular radiators in such a way that we have been able to lessen not only the red light, which is indispensable in infrared technology, but also the tube's glare. Thanks to a double coating inside and outside the heating tubes, we have been able to prevent light emission by up to 80%. This leaves a soft light which does not affect other light sources, for example patios and balconies, in the surrounding area. Ultra Low Glare products offer a compelling combination of the effective heating power of infrared short-wave technology and an ideal light source for a pleasant candle-lit atmosphere. Ultra Low Glare is now installed in all Burda TERM 2000 versions IP24, IP44, IP65 and IP67 radiator series as well as in all PerfectClime radiators.

Good to know

TERM 2000 HEAT FOOTPRINT
WITH 45° INSTALLATION ANGLE

GAS DEVICE

Short operation time

Traditional gas patio heaters use 11 kg gas bottles, which have to be changed after **8-11 hours**.

11 kg bottle propan gas: 20 €

Consumption 1 kg/h:

Cost per hour = 1,81 €

BURDA RADIANT HEATER

Long operation time

Infrared short-wave radiant heaters only need a new heating bulb after **some 5.000 working hours**.

2 kW electr. supply at actual price = 2 x 0,24 €:

2.000 W radiant heater:

Cost per hour = 0,48 €

Saving per hour =

1,33 € or more than 70%

With same operating cost

= 3-4 BURDA radiant heaters

= 1 Gas patio heater

Instant heat for 14 – 16 m² with 1.500 – 2.000 W for 36 – 48 cent per hour

Your dealer

INTELLIGENT DECISIONS!

Our clients value the outstanding quality and the broad range of application of our products. Whether in the hotel or catering industry or in private areas the BURDA infrared short-wave technology heater and cooler product range convinces the world leading brands and industries (MS Europa, the best cruise liner in the world). Choose the intelligent solutions to your needs.
